

SAMPLE READER

EX-VIVO OBSERVATIONS

The Sample Reader

The Sample Reader is a versatile accessory that transforms the C-Cube camera into an ex-vivo imager.

Thanks to an ingenious set of slides, each specific to a type of observation, easily capture images of small objects, liquids, powders or creams, or even hair or sample patches.

Custom-made Slides

Creme, liquid, Sebutape®, D-Squame® patch or tablets...

We certainly have the slide that you need already in our catalogue. Place your sample there and insert it into the Reader to obtain a clear and standardized image.

We can also provide specific slides according to your needs.

Adjustment

Thanks to a rotating ring, you can easily adjust the sharpness of your images for a more detailed observation. No matter the size of your sample,

We guarantee the highest quality image from your C-Cube system.

Examples of images created with the Sample Reader

1. Capsule

Evaluate the manufacturing quality of capsules, or the color-stability

2. Liquid

Measure the color of a solution.

3. Sebutape® Patch

Quantify the seborrhea by observing standard sebum sample kits.

4. Tablet

Observe a tablet's coating for quality control

5. Cream

Study the color consistency of your creams or pigments

6. D-Squame® Patch

Quantify the skin's dryness by observing patches of skin flake samples
